Energy West Controls Announces New Partnership with Armstrong International in Montana

Salt Lake City, March 17, 2022 – Energy West Controls (EWC) and Armstrong International announce a new partnership to service Montana.

Energy West Controls (EWC) announces representation of Armstrong International, world-leading manufacturer of steam, condensate, and hot water control products in Montana. For over 40 years, EWC 's expertise has identified and solved the toughest steam challenges for industry in the Rocky Mountain region.

“The EWC team is excited to expand our offering of rugged, hardworking products, state-of-the-art technology, custom-engineered systems and services,” says EWC VP of Operations Justin Rich. “We are ready to help you improve efficiency and reduce energy consumption and emissions in Montana.”

EWC has an established team of Sales Engineers, Applications Engineers and Customer Support Specialists. Along with technical industry expertise, customer service is the highlight of entrusting Energy West Controls with your steam, air and hot water business. Residing in Montana, Sales Manager Jaimie Garvin states, “With the addition of Armstrong products in Montana, we have an opportunity to integrate and support engineered steam solutions to solve automation challenges in every market segment.”

The EWC sales and support of Armstrong products, specializing in steam traps, The Brain and condensate manifold assemblies will give customers in Montana cost efficient, innovative solutions in the refinery, hospital, pharmaceutical and sanitary industries. The factory trained Sales and Support team, the “Experts at the Heart of Industry” will configure, quote and order Armstrong products with reliability and outstanding customer service.

About Energy West Controls (EWC)
